### **DETAILED ACTION**

1. The following communication is in response to Applicant's amendment filed on December 1, 2005.

#### ***Status of Claims***

2. Claims 22 and 24 are currently amended. Claims 1-21, 23, and 25-28 are cancelled. Rejections are as stated below.

#### ***Response to Arguments***

3. Applicant's arguments with respect to claims 22 and 24 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3624

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 22, 24 rejected under 35 U.S.C. 102(e) as being anticipated by Watanabe et al. U.S. Patent No. 6,877,031.

Watanabe discloses a network photograph service system, providing a user with a digital photograph service on a network by exchanging via the Internet (column 5 line 67- column 6 line 2), consisting of film being read in by a digital scanner at a mini-laboratory, and generating a low resolution image from the scanned data (column 6 lines 36-40), registering said low resolution image wherein the image is assigned a registration ID, and storing said low resolution image in the center server. Watanabe further discloses a user A using a personal computer to transmit the image ID to the center server, the center server retrieving the image file indicated by the submitted image ID, and transmitting the image over the internet as an email attachment to an address provided by the user A (column 7 lines 38-54). Based on the teachings of Watanabe, the disclosed system inherently includes the ability of user A to retrieve the image file, transmitted via email, on the same personal computer from which user A submits the image ID.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
